Important Notice for Lowe's Traditional EDI 855 Reverse Purchase Order Vendors - Reserved Purchase Order Number Reset

This email pertains to Lowe's Traditional EDI 855 Reverse Purchase Order Vendors. If your company is not exchanging the EDI 855 Reverse PO document with Lowe's, it is not necessary to inquire about setting it up with Lowe's and this email can be ignored.

Valued EDI Reverse Purchase Order Partners,

To support Lowe's motto to "Never Stop Improving", we are in the process of upgrading our replenishment systems. With this upgrade, we will be going through a Purchase Order number reset back to 7 digits for reserved PO numbers. PO numbers reserved by Reverse PO Vendors via the PO Reservation Application on LowesLink, as well as those reserved by the Inventory Fulfillment Manager between 1200000 to 100000000 will no longer be valid. The PO's that were selected to be cleared have not been in use for 6 years so **we are not anticipating any impact to our vendor community**. Currently, vendors are receiving 9 digit PO blocks of reserved PO numbers. Once this clean-up is completed, vendors will be assigned PO blocks in the 7 digit PO number range. We anticipate the clean-up to be performed on October 13, 2014. Other PO ranges should not be impacted and you may continue to reserve PO numbers via PO Reservation on LowesLink if needed.

Please visit <http://www.loweslink.com/llmain/edirevpo.htm> to review additional information on the Reverse PO Process and PO Reservation Application.

We appreciate your support with this upcoming change to Lowe's Reserved Purchase Order Number process.

For questions on the Reverse PO Reservation Process, please contact your Lowe's Inventory Fulfillment Specialist. For EDI 855-related questions, please email EDI-Production@Lowe.com.

A reply to this email is not required. **Again – we are not anticipating any impact to our vendor community.**

Thank you for your continued partnership with Lowe's.

Lowe's EDI Support Team
