

Compatibility View for IE 10 & IE 11

For Internet Explorer 10 users only:

Sometimes websites don't look like you expect them to - images might not appear, menus might be out of place, and text could be jumbled together. This might be caused by a compatibility problem between Internet Explorer and the site you're on. Sometimes this can be fixed by adding the site to your Compatibility View list.

To turn on Compatibility View

1. See if the **Compatibility View** button  appears in the address bar. (If you don't see the button, there's no need to turn on Compatibility View.)
2. Select the **Compatibility View** button  to display the site in Compatibility View.

Once you turn on Compatibility View, Internet Explorer will automatically show that site in Compatibility View each time you visit. You can turn it off by removing the site from your compatibility list.

For Internet Explorer 11 users only:

Sometimes websites don't look like you expect them to - images might not appear, menus might be out of place, and text could be jumbled together. This might be caused by a compatibility problem between Internet Explorer and the site you're on. Sometimes this can be fixed by adding the site to your Compatibility View list.

To add a site to the Compatibility View list

1. Open Internet Explorer, select the **Tools** button , and then select **Compatibility View settings**.
2. Under **Add this website**, enter the URL of the site you want to add to the list, and then select **Add**.

Note: If you add a site to the Compatibility View list and the page looks worse, the problem might not be compatibility and you should remove the site from the list.

Once you turn on Compatibility View, Internet Explorer will automatically show that site in Compatibility View each time you visit. You can turn it off by removing the site from your compatibility list.
