

# Federal Energy Tax Credit

Customers have a great opportunity to receive a Federal Tax Credit of up to **\$1,500** and save money on future energy costs. Lowe's and Lowe's professional installers can help!

As part of the American Reinvestment & Recovery Act of 2009 the government created the **Energy Tax Credit**. Customers who purchase qualifying energy-efficient products between 1/1/2009 and 12/31/2010 from categories such as doors, windows, roofing, insulation, water heaters and more may be eligible to claim a federal tax credit up to 30% of the purchase price (up to \$1,500) on their 2009 or 2010 tax return.

Lowe's sells and installs a wide range of products which qualify for the **Energy Tax Credit**. To learn more, refer to the sites below or contact your local Lowe's store.

[energystar.gov](http://energystar.gov) – Energy Tax Credit program details

[Lowe.com - Build Your Savings](http://Lowe.com - Build Your Savings) – List of eligible Lowe's products by category, manufacturer certification statements (for tax credit filing purposes) and tools to help homeowners maximize their savings on energy costs

Lowe's will send customers a year-end summary of "Tax Credit Eligible" purchases made with a Lowe's consumer credit card. (**Note:** The year-end summary is not intended as tax advice and may not include eligible Special Order purchases.)

Below is an overview of product categories available at Lowe's, which qualify for the **Energy Tax Credit**. Look for "Tax Credit Eligible" stickers placed on qualifying product categories in Lowe's stores.
